Subject: Air sampling at Haskell Lake Lodge

Mr. Yach,

We have been working with the Lac du Flambeau Tribal Natural Resources Department on the environmental investigation at the Tower Standard site on Hwy 70 in Lac du Flambeau. Kristen Hanson gave me your contact information.

I appreciate your past willingness to allow sampling of groundwater and air at Haskell Lake Lodge. Next week, we will be at the Tower Standard site doing some additional sampling of soil, groundwater and air. We would like to take some air samples in the basement crawl space of your lodge. These samples would be taken over a 24 hour period. Essentially, the sample containers would be opened and then sit undisturbed for that time and be picked up after the time period ends.

Our past sampling done last year showed no unacceptable levels of contaminants which could be attributed to the Tower Standard site. However, we always prefer to take additional samples as a follow-up to the first samples.

I understand from Kristen that the lodge is currently closed. I would like to talk to you about scheduling the sampling. So far we are looking at late next week, possibly Friday or Saturday (4/1 or 4/2).

Please let me know if this would be acceptable and also who to contact for assistance with building access when we are ready to conduct the sampling.

Thank you in advance for your assistance.

Bob Egan
